# WHAT'S THE BENEFIT OF HOLDING THIS TOKEN?

The **Crobnobi** token promotes financial freedom especially for the investors in the crypto space. The creation of this token arise from the problem of pumps and dumps in the chain. This token enables investors and holders the global, financial well-being and mental well-being since this will be a long term project that will be built from scratched and will push through barriers that push people to sell their holdings early. Moreover, this token aims to open the possibilities for the youth by investing early in the token in terms of: control on their money, opportunities and especially financial stability.

# REVOLUTIONARY OPPORTUNITY

The millenials and gen z face a financial crisis, through inheritance of the broken financial world ruled by oligarch and the extreme wealthy people. In this crypto platform, launching projects like Shibnobi will enable not only the youth but also people, to be able to own a company, a partial stock in its IPO stage easily without the wealth requirements and hindrances such as deep connections within the wealthy circle. Moreover the token project will also promote the financial opportunities for the people for them to change this hierarchy by taking the first step on investing in this revolutionary token. In doing this, it will enable people to have full control of their lives by having the financial freedom wherein true freedom lies.

Since this is a community token, the goal of this project is to have the community wherein all sectors of people, the middle class, upper class and the lower class will interact and discuss and share contents in which people will be educated in terms of financial literacy that can be life changing to some people. Through this community owned-project the **Crobnobi** token, one can not only learn the ways of being financial literate but also this will open the opportunities for people in the crypto space where new changing order in finance happens.

# **DRIVING FORCE BEHIND THE TEAM (VISION AND MISSION)**

The team are adopters of crypto in early 2021, which met each other in the crypto space. Thus, gave them the idea and conviction that connections, friendships and people to get alpha information can be built within the crypto space. The team knew that connections can be strengthen and bond can be further enhanced if they have the same common goal or similarity. Thus, the idea to create a community token wherein people of similarities with the common goal in revolutionizing crypto space and having the capability of financial freedom will be built and formed. As alike persons joined together and help everyone to take shape and take footings in the crypto space.

Moreover, **Crobnobi** strongly believes that not only entrusting the project to community is important. The creator's actions is also crucial. This can be in the form of development and utilities. Thus, the project aims to form an ecosystem under it's coin that will comprise of swap, launchpad, DAO and play to earn games and metaverse coins. Through this, it will further drive the adoption not only by the community but also the investors. Further, the combination of project's development utility and the community-driven token will hope to result in a stronger bond and tighter community.

# **THE CROBNOBI ECOSYSTEM**

The **Crobnobi** token as further progresses will eventually comprises of utilities through development such as the swap, launchpad, DAO, staking, nft, play to earn games and metaverse tokens.
